## Education

### Graphic Era Hill University

2023 - Present

*B.Tech in Computer Science and Engineering*

### The Indian Academy

2023

*Intermediate*

### The Indian Academy

2021

*Secondary*

## Technical Projects

### SagarAI | *Python, Large Language Models(LLMs), Retrieval-Augmented Generation(RAG), Docker*

Nov 2025

Guide: Mr. Mukesh Kumar

- Designed and deployed an intelligent prompting microservice for **retrieval and analysis** of **integrated ocean and marine science data**.
- Implemented **broker server** to manage concurrent users and to perform context generation(RAG based), with support for horizontal scaling.
- Prepared **LLM intelligence server** which uses **LLM model pool** to utilize different models as requested by users
- Containerized the LLM Intelligence Server with **Docker** and broker server to be served as single abstracted service interface.

### SecureX File Storage | *Flutter, Dart, AES-256 Encryption, Backblaze B2, Cloud Storage*

Jan 2025

- Developed a **cross-platform cloud storage system** with focus on data security and user privacy with two layers of encryption.
- Implemented **client-side encryption** with **AES-256**, encrypting user files before uploading.
- Built dynamic on demand key generation which is **generated at time of upload/download** to ensure the secret key is never stored.
- Restricted upload, download and deletion through **SignedUrl based authorization**.

### Proof-of-Intelligence (PoI) | *Python, LangGraph, ChromaDB, RAG, FastAPI, React, Rust, Blockchain*

April 2026

- Designed a **7-stage AI governance pipeline** using **LangGraph** and dual-LLM validation to enforce structured reasoning and economic staking before AI agents execute on-chain actions.
- Integrated **RAG with ChromaDB** for runtime policy enforcement and implemented an adaptive feedback loop where stake outcomes (release/slash) update agent risk thresholds.
- Built a **Human-in-the-Loop** React/Typescript dashboard with FastAPI and SSE, hashing reasoning artifacts via SHA-256 for tamper-proof on-chain audit evidence.
- Deployed **5 Rust WASM smart contracts** on WeilChain with compliance reporting aligned with EU AI Act and DPDP Act requirements.

### Blockchain Powered Payment Interface | *Solidity, Smart Contracts, Flutter, Avalanche Testnet*

Nov 2025

- Built a blockchain-powered payment DApp using custom tokens.
- Implemented marketplace to spend the CollegeToken (custom token) using the smart contract.
- Introduced a **reward mechanism** for giving 5% cashback on item purchased using the token on the marketplace.
- Integrated **WalletConnect** to support the external wallets for easy approval of transactions.

## Technical Skills

**Languages:** C, C++, Java, Python, Dart, JavaScript

**Frontend:** React, Tailwind CSS, HTML5

**Backend & Frameworks:** Django, Node.js, Flutter

**Cloud & Databases:** AWS, GCP, Backblaze B2, Supabase, Appwrite

**DevOps & Containerization:** Docker

**Developer Tools:** Postman, VS Code, GitHub, Requestly

**Cybersecurity:** Wireshark, Nmap, Metasploit

**AI/ML:** Large Language Models(LLMs), RAG, CNN

## Achievements/Certification

- Ranked **Top 5** out of 50 teams participating in the IIT Patna cybersecurity Bootcamp Assignment, demonstrating networking and social engineering skills.
- Secured **Top 15** position among **more than 5,000** teams in the Graphethon National Hackathon, successfully progressing through two stages of elimination (Top 100 and Top 50) to reach the final.
- Enterprise AI by IBM SkillsBuild
